BURNS RAPS GOMPERS

America's Labor Leader Planned His Assassination.

A very remarkable accusation against Samuel Gompers, president of the American Federation of Labor, was made by Detective William J. Burns of New York, when he arrived in that city on his trip across the continent following clues to the man "higher up" in the labor union whom he believed were behind the McNamara's in their dynamiting activities.

"The purpose of Gompers in his incendiary talk was to get me assassinated," said Burns in an interview at the Herald y and registered Square hotel shortly after his arrival. "When he gave out 1911, and end his statement after these men were arrested, in which he accused me of training up a case and planting the dynamite, he planned to stir some crank to keep on so that he would take a shot at how soon we. DIRTY EGGS COST FARMERS MILLIONS

West Virginia Shares in Great Annual Loss—Infertile Eggs Will Not Spoil So Easily as Fertile Eggs and Can Stand More Heat, Which is the Cause of One-Third of the Loss.

Five million dollars a year is the estimate of the Department of Agriculture of the amount lost by the farmers of the United States on account of dirty eggs. And, of course, West Virginia being a great egg producing State shares in that loss. This loss says secretary Wilson of the Department of Agriculture, is very largely brought about by not gathering the eggs often enough. In wet weather more dirty eggs are found than at any other time, because the mud or other filth carried into the nest on the hen's feet. Eggs deposited on the ground or around hay and straw stacks become stained and are classed as "dirty." While dirty eggs may be perfectly fresh, they invariably sell in the market at a lower price than a few

MAY LOSE EYESIGHT

Sheriff of Wyoming County Used Turpentine and Sulphuric Acid

John W. Ball, sheriff of Wyoming county, whose home is at Pineville, was found by Congressman accompanied by Dr. Myers of Pineville, to consult a specialist who will be asked to do what he can to save Sheriff Ball's eyesight. A few days ago the sheriff attempted to mix sulphuric acid with turpentine in a bottle with the intention of making a liniment for application on an arm. After the acid and turpentine had been placed in the bottle the sheriff commenced to shake the contents with the result that an excess of the acid escaped and fell on the sheriff's face and eyes. He was seriously hurt and his eyesight is threatened. In addition to being the wealthiest man in Wyoming county, he is a large owner of land.
